February 28, 2018

Dear Valued Customer,

Varian maintains a high standard for the serviceability of our products, and must occasionally discontinue support due to technological obsolescence. Consequently, we are writing to inform you that Varian will no longer offer support and maintenance of ARIA® oncology information system version 11 with an effectivity date of December 31, 2019.

This includes stand-alone and integrated systems, and all sub-systems under the parent version listed above. Sub-systems include:

- Information Exchange Manager (IEM)

Note: The version of your system can be determined by selecting Help > About, from within the software.

Varian will continue to provide full support for these products under agreements in effect until December 31, 2019. After this date, Varian will continue to address any safety concerns that may arise with respect to these products. Varian will also honor all support contracts currently in effect but no contracts for ARIA oncology information system version 11 and below will be renewed.

Our goal in making this announcement well in advance is to provide you adequate time to make necessary plans for upgrading your ARIA oncology information system.

Current ARIA customers who have a software agreement or service contract might be eligible for an upgrade to the latest ARIA version. Customers who do not have a software service agreement may sign a software service agreement upgrading their ARIA system as part of that new contract. Customers who opt not to upgrade their systems will be bound to the end of support date of December 31, 2019.

We would also like to make you aware that Dell will no longer be selling servers with Windows Server 2008 R2 operating system.

For details on the options available to your department, please contact your local Varian Oncology Systems Sales or Service representative.

For more information about ARIA, please visit www.varian.com or www.MyVarian.com.

I would like to personally thank you for using Varian products. Your support and faith in Varian is greatly appreciated. We hope to continue as your partner of choice for comprehensive solutions for radiotherapy, radiosurgery, proton therapy, brachytherapy, and informatics software for managing comprehensive cancer clinics, radiotherapy centers and medical oncology practices.
